REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Applicants arguments and amendments have caused removal of all previously prior art rejections. Dietlein et al. (US Pat. 4,719,251) no longer can be used as a prior art reference against Applicants instant claims for the following reasons: (1) Applicants amendments now require that the hollow microspheres be present from 30-75% by weight. The only working example which utilizes glass microspheres does so in amounts close to 10% by weight, which is much lower than the claimed amounts. (2) Applicants now claim that the hollow microspheres are present as a mixture of hollow microspheres with different melting points; a feature not taught by Dietlein. (3) Applicants have shown through working examples that mixtures of hollow microspheres with different melting points affords paste compositions with higher stability as compared to a paste composition which includes hollow microspheres which exist as a single type of microsphere with one melting point. (4) The glass microspheres employed by Dietlein are actually not the preferred filler. Dietlein teaches employment of expanded vermiculite as a filler for the fire barrier compositions taught therein. Samples 1 and 2 of Table 4 of Dietlein show that using unexpanded vermiculite or glass microspheres leads to poorer char strength, char depth and greater shrinkage than analogous compositions which employ expanded vermiculite (samples 3 and 4 of table 1). Therefore, there is no motivation for a person having ordinary skill in the art to adjust the amount of glass microspheres of used in sample 2 of Dietlein (that is, add at least a 3-fold increase of glass microspheres) as well as to employ glass microspheres with differing melting points as required by the instant claims. Such adjustments are believed to required improper hindsight reconstruction.

Election/Restrictions

Claims 1 and 26 directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 24, 25 and 27-30, which are directed to a process of using the allowable product of claims 1 and 26, which were previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 7/31/09 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Correspondence

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
